

Driver Instructions

In the event of a DOT inspection, start by opening the menu and selecting “Roadside Inspection”.

This screen will display all of the necessary information the DOT inspector needs.

You can use your phone or tablet as a digital display for the official.

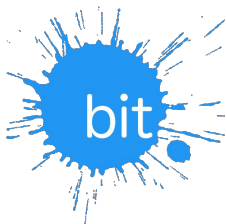

Driver Instructions

NOTE: When using an ELD you are *not* required to produce a paper or printed log. You have the ability to email your logs to DOT officials from the BIT ELD app.

In the case that your ELD malfunctions, you have 7 days to get the issues fixed. You must keep paper logs in your vehicle to record your hours of service if your phone or tablet breaks.

Contact BIT to troubleshoot your issues and get a replacement unit if necessary.
